

# Pre-Fire Mitigation & Waldo Restoration

## Scaling Up Partnerships and Funding

- Formalize USFS/CSU Partnership 2013 – 2015
  - Waldo Restoration – USFS lands (EWP w/SUP)
  - Wildfire Risk Assessments
  - NEPA ~ 50,000 acres permitted in key watersheds
- Increase CSFS funding to \$500,000
- Private lands partnerships \$100,000
- CSFD & City Forestry \$100,000
  - Local raw water and distribution infrastructure

Post Waldo Damage

# Pre-Post-Fire Mitigation

Identify high priority post-fire flooding issues:

- Priority watersheds and infrastructure at risk
- Pre-fire mitigation actions constrained
- Take lessons learned from Waldo:
  - Upgrade culverts
  - Identify sedimentation retention areas
  - Improve and restore riparian areas as filters
  - At risk pipelines

# Strategic Watershed Restoration

- Identify current erosion-water quality impacts
- Identify current erosion-access issues:
  - Water operations
  - Pre-fire mitigation
  - Fire suppression
- Improve functional watershed processes
